Work Experience

TechSurge | Big Data Analyst Intern **Feb'23 – Apr'23**

- Proficiently orchestrated the seamless migration of data from on-premises MS SQL Server instances to a Data Warehouse on **MS SQL Server,** employing **SSIS**.
- Expertly crafted **tabular** and **multidimensional cubes** utilizing **SSAS**.
- Demonstrated prowess in generating impactful dashboards and reports through **Power BI**, drawing insights from source Data Warehouses on **Hive** and MS SQL Server.

Skills

| Python | SQL | C++ | Cloud Data Engineering | Data Warehousing | Apache Spark | Apache Airflow | Apache Kafka | Databases (SQL Server, Oracle, PostgreSQL) | Power BI | Hadoop (Hive) | Linux | Azure Databricks | Azure Data Factory | Azure Synapse Analysis | SSIS | SSAS | Computer Networking | Web Scraping | Git | Generative AI |

Education

NED University of Engineering and Technology Karachi, Pakistan **Aug'20 – Aug'24**

- Bachelor of Sciences in Computer Science and Information Technology | CGPA: **3.37/4**

Projects

Tokyo Olympics Azure Data Engineering Project **Nov'23**

- Proficiently executed data ingestion from API to **Azure Data Lake Gen2** utilizing **Azure Data Factory**.
- Applied advanced transformations and ingested data into Azure Data Lake using **Azure Databricks** and **Pyspark**, ensuring seamless data processing.
- Conducted thorough analysis and modeling of the transformed data within **Azure Synapse Modern Data Warehouse.**
- Employed **Power BI** to create insightful visualizations of the modeled data, enabling clear and impactful presentation of key insights

(ETL) for Weather Data using Apache Airflow and Amazon S3 **Dec'23**

- Implemented **Apache Airflow** ETL pipeline for real-time weather data extraction from **OpenWeatherMap API**.
- Conducted data transformation and loaded processed data into **Amazon S3** for scalable storage.
- Utilized **Ubuntu** and **SSH** for remote access, demonstrating proficiency in data engineering and cloud storage.

Scholarship Data Analytics with Azure Data Engineering **Jan'24**

- Integrated data from **GitHub API, MS SQL Server, Amazon S3** via Azure Data Factory, processed in Azure Data Lake Gen 2, and analyzed with Azure Databricks for the project.
- Crafted a dashboard with **Power BI** for visual insights in the scholarship data.

kafka Azure Data Engineering Real-time Stock Market Project **Feb'24**

- Developed and implemented a **real-time stock data** processing pipeline leveraging **Apache Kafka**, Python, and cloud technologies on Azure platform.
- Produced and consumed **live stock** data streams using Python libraries for **JSON,** Apache Kafka, and **Pandas**, ensuring efficient handling and processing of data in real-time.
- Utilized Azure **Data Lake Gen2** for secure storage and **Azure Synapse Analytics** for querying and formatting real-time stock data, enabling rapid insights and decision-making in a dynamic market environment.

Licenses and Certifications

- Microsoft Certified: Azure Data Engineer Associate (**DP-203**).
- Microsoft Certified: Azure Fundamentals (**AZ-900**).
- Microsoft Certified: Data Fundamentals (**DP-900**).

Academic and Extracurricular Achievements

- Held the designation of **Gold** Microsoft Learn Student Ambassador (First in the history of Karachi).
- Served as Microsoft Innovative Education **Expert.**
- **Secured 1st** position in coding competition **organized by Koderz Club** and received **cash prize of 100,000 PKR**.
- Earned **Azure Kudos**, **Community Hero** and Mentor badger from Microsoft on **community service**.
- Successfully conducted a series of workshops **as a speaker** in **collaboration with HEC** on Azure Data Engineering

Positions of Responsibility

Microsoft Learn Student Ambassadors' Club NEDUET Karachi | Lead & Founder **Jan'22 - Present**

- Mentored **90 CSIT** students in their preparation for Free Cloud certifications, resulting in **6 students** successfully attaining Microsoft certification, collectively valued at approximately **$594.**
- Facilitated complimentary access to LinkedIn Premium for **24 students and teachers**, with an estimated value of **$5736.**
- Orchestrated and led high-caliber workshops covering **Cloud Computing, Data Engineering, Git, and AI**.
- Actively championed events such as **Microsoft Imagine Cup, Student Summit, and Edu Day**.
